

## Outdoor maths

Walk around your street and choose some house numbers. Make each house number into a number sentence!

You can do + - X or ÷

For example,  
If you see a house number 20  
You could do  
 $10 \times 2 = 20$   
OR  
 $20 - 3 = 17$

If you are struggling because the numbers are very big you could split them up to do your questions.

For example,  
If the house number was 132  
You could do  
 $13 \times 2 =$
